under actual working condition, I consider that the Sanitary Engineer's action is justified in having placed orders for the supply of these A.C. pipes. In the circumstances, I request that his action may be ratified.

SANITARY ENGINEERING BRANCH (P.W.D.).

From
Sri S. Rajagopalan, B.E., M.I.E.,
Sanitary Engineer,
Chepauk, Madras.

To
The Chief Engineer, P.W.D.,
(General & Buildings),
Chepauk, Madras.

No. 15110-W2/54-2 dated 12-10-1954.

Sir,
Sub: Mangalore Water Supply Scheme -- III Stage --
Distribution system - Use of A.C. pressure
pipes in sizes 3" and 6" diameter - Approval -
sought for.

Detailed plans and estimates for the III Stage of distribution system of Mangalore Water Supply Scheme have been forwarded to you for technical sanction in this office No. 15110-W2/54-1 dated 6-9-1954 and orders are awaited. The cost of the scheme at present day rates works out to Rs. 23.59 lakhs. I intend to use A.C. pressure pipes side by side with the Cast iron pipes in smaller sizes of 3" to 6" diameter so that we shall have an opportunity to study the comparative utility and merits of the two classes of pipes under actual working conditions especially in a place like Mangalore.

2. I accordingly called for quotations from M/S. Asbestos Cement Ltd., Madras, who are the sole representatives for the imported A.C. pressure pipes from U.K. and M/S. The East Asiatic Co., (India) Ltd., who are the sole Agents of M/S. Asbestos Cement 'Italit' pressure pipes of Italy. The latter have regretted their inability to offer any of the pipes from stock; nor did they furnish any quotations. M/S. Asbestos Cement Ltd., Madras, in their letter No. KN/NS dated 24-9-1954 quoted their rates for the immediate supply of 20,000 R.ft. of 3" diameter and 15,000 R.ft. of 6" diameter A.C. pressure pipes from the ready stock available with them and for the C.I. detachable joints required in about 12/14 weeks from the date of the receipt of the order. This firm has also offered a special discount of 10% on the prices quoted by them. The A.C. pipe materials are of a proprietary nature; and hence there will be no particular advantage in calling for sealed tenders in this case. A tender call will only involve delay without serving any useful purpose. With Central financial Assistance in the picture, there is going to be a rush by all States for pipes in the near future. It is therefore advisable that we secure our requirements from immediate stocks available in Madras and incur the expenditure this year itself from the allotment of Rs. 23.0 lakhs in the revised estimate for the year 1954-55 for Mangalore Water Supply Scheme.

3. Considering all these factors I have placed a firm order in my letter No. 16393-W2/54-1 dated 12-10-1954 on M/S. Asbestos Cement Ltd., Madras, for the supply of 20,000 R.ft. of 3" diameter and 15,000 R.ft. of 6" diameter A.C. pressure pipes from the ready stock now available with the firm and also for the supply of the required number of C.I. detachable joints for these pipes. The cost of these pipes and joints works out to about Rs. 1.2 lakhs.

4. I request that my action in placing the order for the pipes on the firm may kindly be approved. A similar bulk

P.T.O.

quantity of A.C. pressure pipes was obtained from this firm by the Department for the requirements of the Tiruchendur, Kayalpatnam Coimposite Water Supply last year.
